- Number of consumer packagings: 4
- Outer carton (L x W x H): 38.74 x 33.34 x 14.92 cm
- Gross weight: 2.5 kg
- Nett weight: 1.736 kg
- Tare weight: 0.764 kg
- EAN: 87 12581 52326 8

HeatProtect

Highlights

HeatProtect prevents heat
You use your netbook on your lap to watch videos on a train, listen to music at the beach and browse the net, chat with friends or work on documents when you are at the airport. But over time the heat generated from sustained use makes your legs feel uncomfortable and could damage yout netbook. Philips HeatProtect protects you and your netbook by keeping you both cool with its layer of aluminum to disperse the heat from your netbook, rigid surface to give it the air circulation it needs and an insulating layer to protect you from high temperatures.

Stable surface for the netbook
If you use a magazine as a desk on your lap it is very slippery and is not a stable surface for your netbook, especially when you want to assume a comfortable position for your body. And you might damage your netbook if it slides off. The Philips Netbook Sleeve has a flat top surface for your netbook and a soft underside for your lap, so you can keep your netbook stable and secure while you watch YouTube, listen to music or work on documents anywhere you go.

Comfortable to use on your lap
Soft comfortable underside for your lap

Easy to slip your netbook in

Philips Netbook sleeve has three sides opening, so you can slip your netbook in easily.

Rubberized zippers
Your netbook or notebook might get scratched by the zipper head when putting into your sleeve or bag. The Philips sleeve and bag use a rubberized zipper puller reduces the possibility of your netbook and notebook being scratched as well.
